Link Microtek appoints Leigh Andrews as service administrator

In her new role, Leigh will ensure smooth running of Link Microtek's service operation, which mainly handles calibration and minor repairs of the thousands of Nardalert personal safety monitors used in the UK by telecommunications personnel when climbing mobile-phone masts.

Link Microtek, the specialist supplier of RF and microwave components, subsystems and instrumentation, has appointed Leigh Andrews as service administrator - a position in which she will primarily be dealing with UK service and support for the Narda range of non-ionising radiation monitors, survey meters and probes.

As well as being qualified in business administration, Leigh is experienced in many aspects of customer service and sales support. She also has exceptionally good organisational and communications skills.
