ENGINEERING DIVISION

Link Microtek has brought out a new shortform catalogue detailing the extensive range of microwave and RF components, assemblies and sub-systems manufactured in-house by its Engineering Division in Basingstoke.

Concentrating mainly on waveguide products, this 36-page A4 full-colour catalogue covers adapters, attenuators, couplers, filters, horn antennas, ortho-mode transducers, rotary joints, subsystems, TEM cells, terminations, and waveguide hardware in both rectangular and double-ridge styles.

Each product entry consists of a colour photograph, a list of features and a summary of the standard models available, including key technical specifications such as frequency range and physical dimensions.

The catalogue can be obtained in printed format by e-mailing sales@linkmicrotek.com or downloaded as a PDF file via the link on the 'Engineering' page at www.linkmicrotek.com.
