

## WEEE Declaration of Compliance

The Policy of Link Microtek Ltd is to finance the treatment, recovery and environmentally sound disposal of all WEEE returned by customers (at their expense). Customers may, alternatively, opt to handle the obligation for the disposal of WEEE themselves. Arrangements cover all the company's obligated WEEE. Essentially, equipment received is stored and periodically disposed of using the services of an AATF, as evidenced by a standard note of recycling or disposal. This system has been operational since 1 July 2007; details are available on request and Terms and Conditions of Sale define respective responsibilities and arrangements for the transport and processing of WEEE. Link Microtek implements its own arrangements for the collection and treatment of its obligated WEEE and does not outsource the management of WEEE disposal to its Producer Compliance Scheme organiser.

Link Microtek's WEEE Producer Registration Number is **WEE/JB0044SY**.
